At Wing Farm, we believe everyone deserves a healthy meal and a decent income. We train farmers to adopt modern agricultural practices to boost agricultural productivity, increase food security, and improve rural livelihood.

Given the right wind conditions, wind turbines can be a serious source of power. Denmark, for instance, produces 16.5% of its electricity from alternative energy (mainly wind) and is aiming for 30% by 2025. While Israel may not have the same blustery breezes as those which caress Scandinavia, Ben-Dov has said that wind potential exists in Israel.
